Cortland, NEW YORK – Joyner Outdoor Media announces the **Joyner Outdoor Media Proudly Announces the Book Release of : *Random Musings of The Left Hemisphere* by Mike Joyner**

The author’s latest book release is a collection of random musings made over the past decade in response to the many societal skirmishes, and forays of maligned and upside down positions taken by increasingly radical liberals and leftists of a divided country. The book features personal reflections and personal testimony of bearing witness to a profound event of survival. The new release is currently available in paperback, hardcover, and kindle.

Publisher's Summary - “Random Musings of The Left Hemisphere” is a collection of personal opinions, reflections, and epiphanies gained from decades of hands-on living. A worldview fully grounded in compassion and sound reasoning is expressed that in stark contrast, refutes common false narratives perpetuated by the far left, academia, and a sympathetic media that has abandoned professional journalism in favor of activism and influencer self-gratification. We are over-saturated with utopian thesis-driven views formulated in a vacuum, and regurgitated in never-ending echo chambers.

The latest offering from the author is a unique departure from his well-known outdoor book titles. A random glimpse into the thoughts, and observations of a left hemisphere dominant thinker. As an engineer, awarded worldwide patents, a passionate outdoorsman, and conservative by nature, these attributes are a natural fit for the project. The reader will find a frank and honest rendering of ideas and observations to ponder and consider.
